- Prinect Mobile

Business Manager

Remote Access

Scheduler

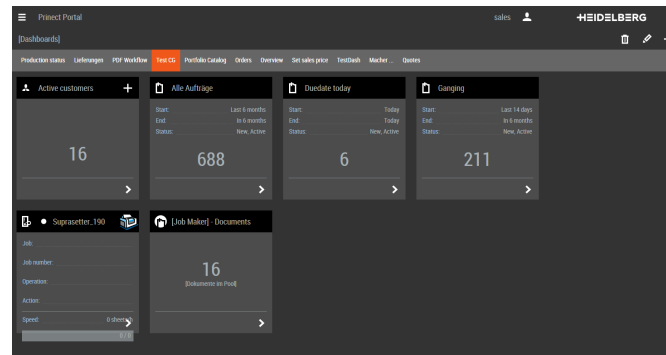

Analyze Point

Prinect Portal - Overview

Now: Integration of all browser based features into ONE homogenous Portal

- Consistent look&feel
- Consistent simple operation
- Consistent user/rights management

Prinect Portal - Overview

Dashboards and Widgets

- Multiple user/task specificly configurable Dashboards
- Browser based functionality provided as Widgets

The image shows two screenshots of the Prinect Portal interface. The left screenshot displays a dashboard with several widgets. The top row includes 'Active customers' (16), 'Alle Aufträge' (688), 'Duedate today' (6), and 'Ganging' (211). The bottom row shows 'Suprasetter_190' and '[Job Maker] - Documents' with a list of PDF files: 'HDcity_1-10_6C.pdf', 'HDcity_27-36_5C.pdf', and 'HDcity_11-26_4C.pdf'. A red circle highlights a right-pointing arrow in the 'Ganging' widget, with a red arrow pointing to the right screenshot.

The right screenshot shows a detailed view of a job titled '20P-Komma-Brochure (D06-C01001)'. It features a 'Job List' table and a 'PL_Lay ([20 von 20 Seiten zugewiesen])' section with a grid of page thumbnails.

Thumbnail	Job number	Job name	Customer	Order Number	Customer Job Name
	Hot-C02	Hottfolde Job for F&A	Customer Commercial 2	Hot-C02	Hottfolde for F&A
	Hot-C01	Hottfolde Job for F&A	Customer Commercial 1	Hot-C01	Hottfolde for F&A
	D06-C01001	20P-Komma-Brochure	Customer Commercial 1	-	20P-Komma-Brochure
	D06-C01000	20P-Geospedit-Story	Customer Commercial 1	-	20P-Geospedit-Story

- Pallet sheet generation
- Plate Re-imaging (Renderer+Shooter)

Functionality depends on the Prinect components configured in the Prinect system

Prinect Portal – Functional range with Prinect 2017

Sales Widgets

- Customer information
- Order information
- Quote information
- Products information
- Delivery information

Print Buyer Integration Widgets

- Request for quote
- Re-ordering
- Order information
- File upload and preflighting
- Remote review and approval

DEMO

Production Widgets

- Job information
- “Job Maker”
- Device status information
- Checkpoint information/setting

DEMO

Wallscreen Widgets

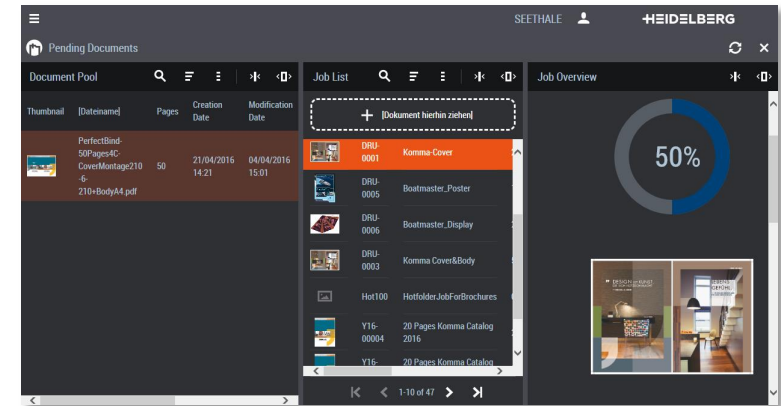

- Machine status
- Total Inking (check for critical areas)
- Pallet sheet generation
- Plate Re-imaging (Renderer+Shooter)

Prinect Portal – Demos

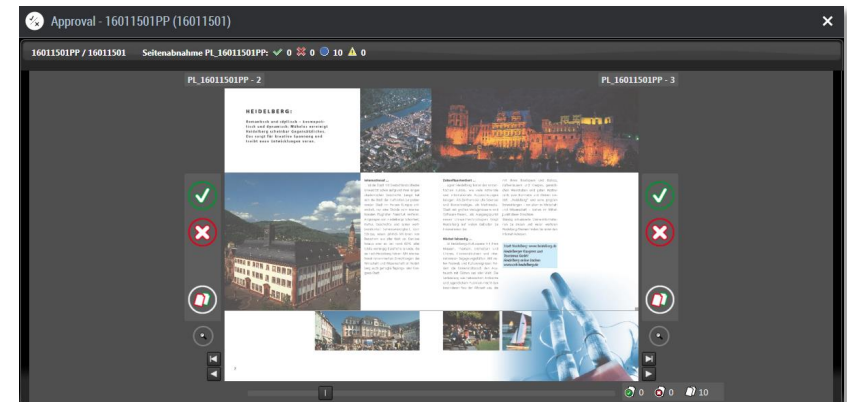

“Job Maker”

- Easy creation of production jobs without using the Cockpit
- In combination with Smart Automation: Easy generation of complete process networks just by specifying the desired print product
- Easy completion of MIS job shells with PDF and process network.

Upload and Approval workflow

- Creation of production jobs, page upload and preflight, remote soft proofing and approval
- Portal functionality replaces former “Remote Access”

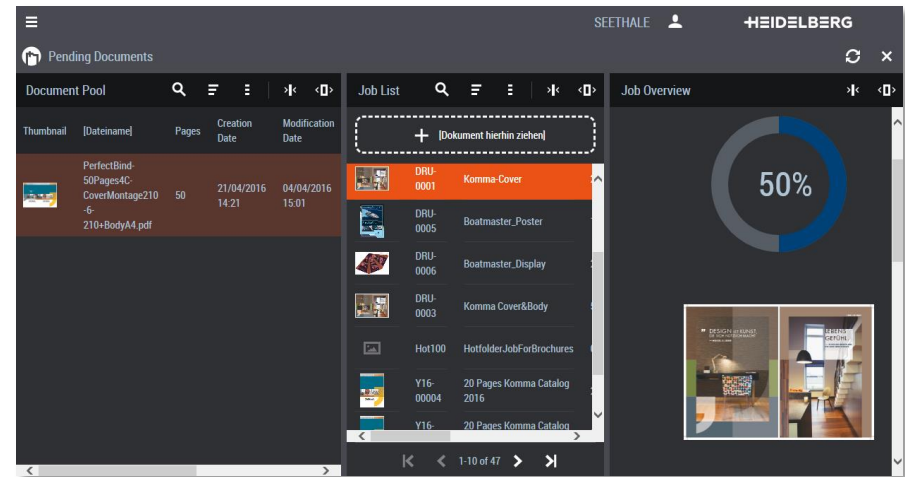

Live Demo

Prinect Portal – Demo:

“Job Maker”

- Easy creation of production jobs
 - Just via drag and drop
 - without using the Cockpit
 - Can be handled by “everyone”
- In combination with Smart Automation:
 - Easy generation of complete process networks
 - just by specifying the desired print product
 - Product template as dropdown choice

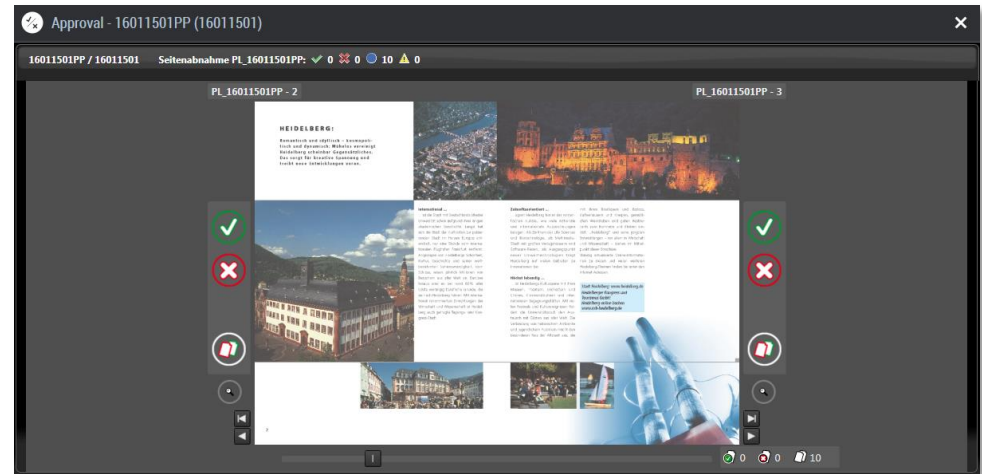

- “Any time – anywhere”:
 - view Job status

Prinect Portal – Demo:

Production and Customer Approval Workflow

- Creation of a production job
 - i.e. via “Job Maker”
 - i.e. via “Hotfolder”
- Automatic processing of job including waiting for approval
 - Widget: Pending approvals
- Prinect automatically send an email with link to the customer
- Your customer: remote soft proofing and online approval

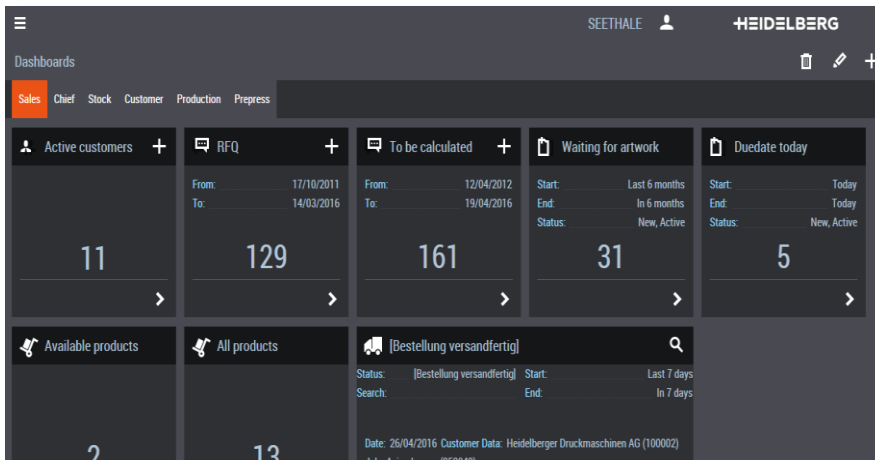

- Prinect Portal: check Job status of customer approval and further processing of the job for plate making

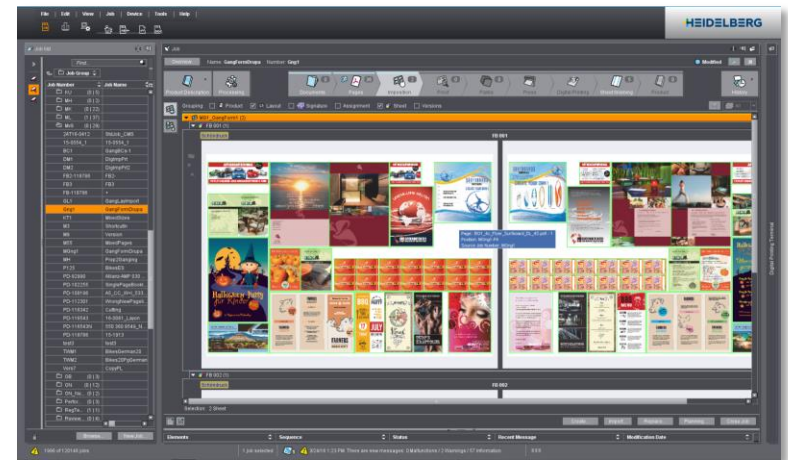

Prinect Portal and Prinect Cockpit

Prinect Portal

Prinect Cockpit

- Easy access to comprehensive information via Browser on devices like laptop or tablet
- Easy creation of production jobs
- Online collaboration with Print Buyers

- Workspace for the print production specialists
- Complete workflow setup and control
- Workflow automation
